Description

Every Christian needs to know the truths presented in this book before he or she can understand even the basics of what God would have us know. In fact, most differences of opinion among Christians about the Bible result from not understanding and differentiating between the things presented herein.

We can't really appreciate our standing or position before God unless we have some understanding of these very important subjects.

F. B. Hole, a cousin of Hamilton Smith, was born in England in 1874. For many years before his call home to be with the Lord in 1964, he was a well-known, beloved and respected Bible teacher among the English assemblies.

From the table of contents:
